

# MAM StockTake

A mobile and tablet application to simplify stock counts

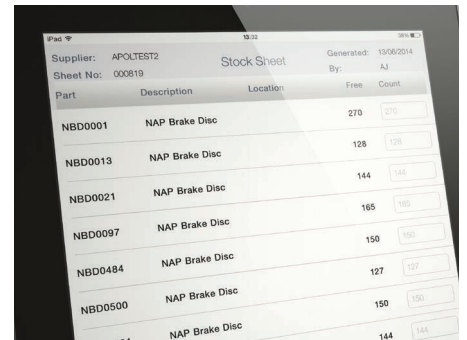

Connects directly to your MAM business management solution in order to access and submit stock sheets and reduce manual data entry

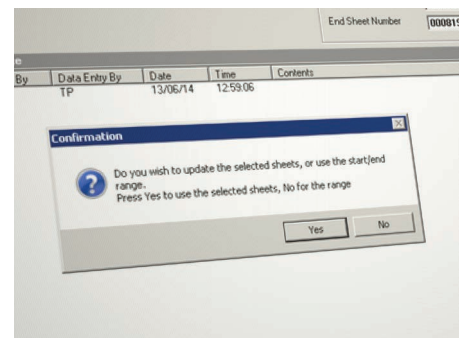

## Key features

- ▶ iPhone, iPad, iPod Touch & Android\*
- ▶ Integrates with MAM systems
- ▶ Sync stock sheets via Wi-Fi or 3G/4G
- ▶ Reduces manual data entry
- ▶ Increases stock count efficiency
- ▶ Download stock sheets to device
- ▶ Bluetooth barcode scanner support
- ▶ Record anomalies on scratch pad
- ▶ Real-time part search (Wi-Fi or 3G/4G)
- ▶ Submit counts back to system

Available for iPhone, iPad, iPod Touch and selected Android devices\*, MAM StockTake works in conjunction with suitable MAM business management solutions (MAM BMS) to provide staff with secure, real-time access to stock sheets. Stock sheets are generated on an MAM BMS and sent to the app via Wi-Fi or 3G/4G. Once a stock sheet is accessed, a full count can be conducted offline, meaning an internet connection is only required to submit the compiled data back to the MAM BMS. The app is available for a range of MAM applications, both cloud-hosted and on-premise, including Autopart, Autopart Tyres and Trader.

Part	Description	Location	Free	Count
