

# Autopartonline

Hosted software for motor factors and retailers

Autopart is a feature-rich, Windows-based application offering fully-integrated point-of-sale, stock control & accounting functionality

## Key features

- ▶ Full Autopart v20 functionality
- ▶ Remotely hosted service
- ▶ Affordable per-user rental
- ▶ Low start-up cost
- ▶ Scalable infrastructure
- ▶ Utilise existing hardware
- ▶ Streamlined implementation
- ▶ Managed virtual servers
- ▶ Secure data storage
- ▶ Remote backup & restore

MAM Software's market leading Autopart application is now available as a remotely hosted, fully managed service. Offering the complete functionality of Autopart, this application utilises virtual servers located in a state-of-the-art data centre, eliminating the need for users to invest in costly server hardware and maintenance. This simplifies the installation process, allows updates to be handled remotely and ensures that new users can be added with the minimum of fuss. The result is tailored software with potentially significant savings over locally installed alternatives.
