

Driversboard

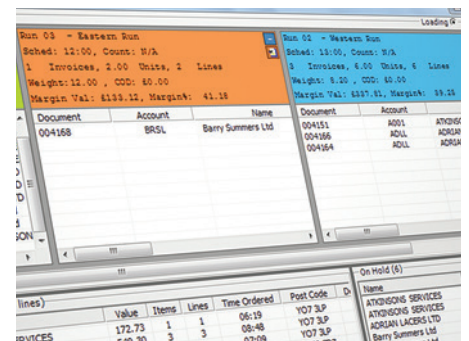

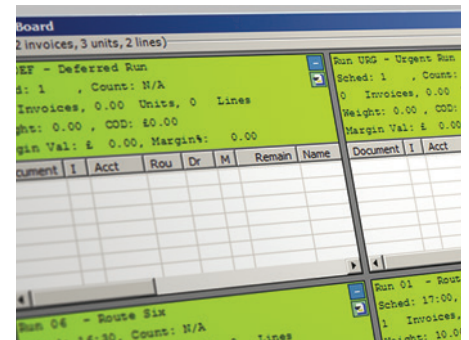

Load planning and delivery despatch management

Driversboard is an intuitive module that routes and schedules orders to improve customer service while minimising operating costs

Key features

- ▶ Define delivery routes
- ▶ Allocate routes to customers
- ▶ Create service level agreements
- ▶ Configure departure times
- ▶ Assign vehicle drivers
- ▶ Print despatch notes
- ▶ Allocate orders to routes
- ▶ Many delivery report metrics
- ▶ Request proof of delivery
- ▶ Record return to base

Driversboard is a vehicle load planning and delivery despatch module that integrates with MAM's Autopart and Trader management solution. It will help despatch managers optimise deliveries to achieve an efficient balance between customer requirements and operational dynamics. It enables orders to be manually or automatically allocated to the correct route to ensure that deliveries are made on time and service level agreements (SLAs) are met. Driversboard's intuitive interface features a simple loading grid with user-defined colour-coding that enables operators to assess the current schedule at a glance.
